5. Data-quality warnings

Data reliability: **Medium** (0 errors, 1 warnings in the most recent 3 fiscal years and any undated checks). Rating rules: Low = at least one error, Medium = at least one warning, High = none.

- [WARNING] balancesheet: 1 row(s) (Sep 2024) do not fall on the company's fiscal year-end month (Mar); treated as part-year data and excluded from annual analytics

6. Methodology

All figures are taken from the latest full fiscal year in the project database (db/nifty100.db). Half-year rows, TTM rows and rows with malformed period labels are excluded; duplicate rows describing the same fiscal year are collapsed.

Scoring thresholds and weights

Analytical summary of reported figures from the project database. Not investment advice; it does not predict prices.

Pillar	Metric	0 points at	100 points at	Weight
Profitability	Return on equity	0%	20%	12
Profitability	Net profit margin	0%	20%	9
Profitability	Operating margin	0%	25%	9
Leverage	Debt-to-equity	2x	0.3x	15
Leverage	Interest coverage	1x	8x	10
Growth	Revenue growth (CAGR)	0%	15%	12.5
Growth	Profit growth (CAGR)	0%	20%	12.5
Cash quality	Cash conversion (CFO / PAT)	0.3x	1x	20

- Points between the two thresholds are interpolated in a straight line and clipped to 0-100. Grades: A (75+, Strong), B (60+, Healthy), C (45+, Moderate), D (30+, Weak), E (0+, Distressed).
- A missing metric, or one excluded because the computed value is outside a plausible range (a sign of bad source data), is dropped and the remaining weights are re-scaled to 100. If less than 50% of the applicable weight has data, the score is withheld.
- Banks, NBFCs and insurers are not scored on leverage, interest coverage, operating margin or cash conversion, because those ratios are not comparable with industrial companies. Their score rests on fewer metrics, so compare them with their own peer group.
- Peer set: the curated peer group from the database if it has at least 3 members, otherwise the broad sector. Percentile is the share of the other peers the company beats, with ties counted half; interest coverage is capped at 100x for ranking.
- Data reliability is derived from the data-quality monitor: missing values, duplicate periods, inconsistent period labels and implausible metrics.
