## 6. Methodology

All figures are taken from the latest full fiscal year in the project database (db/nifty100.db). Half-year rows, TTM rows and rows with malformed period labels are excluded; duplicate rows describing the same fiscal year are collapsed.

### Indicator formulas

| Indicator | Formula |
|---|---|
| Return on equity | net profit / (equity capital + reserves) x 100 |
| Net profit margin | net profit / sales x 100 |
| Operating margin | operating profit / sales x 100 |
| Debt-to-equity | borrowings / (equity capital + reserves) |
| Interest coverage | (profit before tax + interest) / interest |
| Revenue / profit CAGR | (end / start)^(1 / years) - 1 over up to 5 years (minimum 3); profit CAGR only when both ends are positive |
| Cash conversion | cash from operations / net profit (only when profit is positive) |

### Scoring thresholds and weights

| Pillar | Metric | 0 points at | 100 points at | Weight |
|---|---|---|---|---|
| Profitability | Return on equity | 0% | 20% | 12 |
| Profitability | Net profit margin | 0% | 20% | 9 |
| Profitability | Operating margin | 0% | 25% | 9 |
| Leverage | Debt-to-equity | 2x | 0.3x | 15 |

| Pillar | Metric | 0 points at | 100 points at | Weight |
|---|---|---|---|---|
| Leverage | Interest coverage | 1x | 8x | 10 |
| Growth | Revenue growth (CAGR) | 0% | 15% | 12.5 |
| Growth | Profit growth (CAGR) | 0% | 20% | 12.5 |
| Cash quality | Cash conversion (CFO / PAT) | 0.3x | 1x | 20 |

- Points between the two thresholds are interpolated in a straight line and clipped to 0-100. Grades: A (75+, Strong), B (60+, Healthy), C (45+, Moderate), D (30+, Weak), E (0+, Distressed).
- A missing metric, or one excluded because the computed value is outside a plausible range (a sign of bad source data), is dropped and the remaining weights are re-scaled to 100. If less than 50% of the applicable weight has data, the score is withheld.
- Banks, NBFCs and insurers are not scored on leverage, interest coverage, operating margin or cash conversion, because those ratios are not comparable with industrial companies. Their score rests on fewer metrics, so compare them with their own peer group.
- Peer set: the curated peer group from the database if it has at least 3 members, otherwise the broad sector. Percentile is the share of the other peers the company beats, with ties counted half; interest coverage is capped at 100x for ranking.
- Data reliability is derived from the data-quality monitor: missing values, duplicate periods, inconsistent period labels and implausible metrics.
